

Aero Harbour Bridge Trajectory

The Harbour Bridge arc, is the line of an Aero Bowl

The Aero **Revolution** for UK indoor greens

Aero Bowls, the same line every time, **guaranteed**. Every set of Revolution is the same as the next set of Revolution. It's Aero's advanced technology that makes this possible.

The Trajectory

The Revolution as a guide takes grass similar to a Drakes Professional or Henselite Tiger Pro. However, the line (trajectory) of the Revolution to the target is nothing like the above two brands.

Aero is an even draw from mat to jack with a finish that is totally predictable. One can tell where the bowl will stop from half way up the green.

Only Aero have such a unique and accurate trajectory – the Harbour Bridge trajectory.

Half sizes & unique Aero grips

Only Aero offer a full range of half sizes and two unique Aero grips that will give you the confidence on the mat like never before. Sizes from:

| | | | | | | |
|---|----|---|----|---|----|---|
| 2 | 2½ | 3 | 3½ | 4 | 4½ | 5 |
|---|----|---|----|---|----|---|

Ellen Falkner wears Saturn Shoes, plays with Groove bowls during the outdoor season and uses her CX bag and Revolution bowls indoors.

Our weighted shot

The hold on this shot with minimum weight is a **UNIQUE** Aero feature. This is the shot that wins games by trailing the jack or removing a bowl without damaging the head.

Who uses Aero

Aero are used in the UK on Indoor surfaces by some of the very best bowlers in the World:

Ellen Falkner, Willie Wood, Mervyn King, David Bolt, Graham Shadwell, Neil McKee, Sian Gordon and Jeremy Henry to name but a few.

You'll also know Brett Wilkie, Val Smith, Kelvin Kerkow, Julie Keegan, everyone a World Champion and each an Aero player.

The Aero Revolution is now in stock at our Ellesmere Shropshire warehouse (subject to prior sale)

The CX bag is in stock at our Ellesmere Shropshire warehouse

An introduction to Aero Bowls

For over a decade in Australia and New Zealand the Aero owners distributed Taylor Bowls and using their expertise they quickly became the largest reseller of coloured bowls in the world.

When Taylor wanted to do the distribution themselves Aero set about the task of

making the most accurate bowls ever with assistance from the best bowlers in the world and using the latest technology

Kelvin Kerkow OAM

Commonwealth Singles Gold, Multiple World and Australian Champion. Universally regarded as Australia's most accomplished bowler of all time.

Kelvin Kerkow, Brett Wilkie and Ellen Falkner, all world champions had major input into the best line for a bowl and together with Aero engineers came up with the Harbour Bridge Arc Trajectory. Only Aero has this even arc line to the target.

The success of this Arc Trajectory together with the accuracy in manufacture has resulted in Aero becoming the leading brand in Australia with over 12,000 flawlessly matched sets sold to date.

Aero is continually featured on TV and was the major sponsor of World Bowls Adelaide 2012.

Aero – are bowls for discerning bowlers.

Stock is kept in our Ellesmere Shropshire warehouse full details are on our website.
